Expo Milan 2015

"**Feed the Planet. Energy for life**" è this will be the theme of the next Universal Exposition in 2015 in Milan, that 31 March 2008 beat Paris, the city of Smirne with 86 ayes ob B.I.E., Bureau International des Expositions.

The theme of the Exposition, indicates the will of the milanese capital to tackle the great problem of sustainable progress, presenting to the exhibition technological and scientific innovation in the food sector, with the aim to fight against food problems that are still present in several zones of the world.

In the Exhibition of Milan from 1st May to 31 October 2015, the greatest **technic and scientific innovation regarding the food sector, from production to the conservation, to the distribution of food**. Towers, skyscrapers, enlargement and reclaim of the urban area the great Expo of Milan 2015 **will chance completely the face of the lombard main town**,, such as the demonstration of projects presented and plastic models that reproduces the structures and installations, already in exhibition in the places where they will be constructed. presentati ed i plastici che riproducono fedelmente le strutture e le installazioni, già in mostra nei luoghi in cui verranno costruiti.

The idea and the project of Milan Expo 2015 is the gathering of the most prestigious minds of the world and the symbol of Milan 2015 is the Vitruvian man of Leonardo da Vinci, symbol of evolution and growing and especially the study of man for the man.

The Exposition of Milan 2015 offers to the city the possibility to itself and the nation to be in the centre of international economic and social progress, shedding light on progresses that the italian industry of science and technology continues to make, giving its share to the world-wide growing.
